About Me

I am a High-performing, strategically driven Full-Stack Developer, Software Architect, and UI/UX Expert with a proven track record of engineering sovereign, enterprise-grade digital infrastructure. Adept at bridging the gap between sophisticated technical logic and elite user experiences. Specialized in translating complex business requirements into scalable SaaS ecosystems and designing high-converting, minimalist-tech digital storefronts. Expert in native PHP/PDO backend architectures paired with highly responsive, visually stunning frontend interfaces.

Work Experience

Founder & Lead Architect
LUMYNEX | May 2024 – Present

Architected and deployed proprietary, high-performance core software engines for diverse corporate and SaaS applications, prioritizing raw execution speed and complete data isolation.

Engineered VENDO, a next-generation commerce platform designed to give independent merchants complete operational autonomy and data sovereignty.

Spearheaded the UI/UX direction for the entire LUMYNEX ecosystem, implementing a high-end, minimalist visual language that drastically optimized user engagement and system navigation.

Implemented strict DevOps standards, utilizing PM2 cluster management for zero-downtime hot reloads and setting up automated Git-hook deployment pipelines.

Technology Partner & Infrastructure Provider

Stage Food on the Go (FOTG) | January 2026 – Present

Designed, licensed, and deployed the dedicated digital application infrastructure to handle complex transactional logic and operational scaling.

Designed a high-performance mobile and web user interface optimized for high-velocity transactional environments, decreasing cart abandonment rates through intuitive friction-free checkout workflows.

Structured a secure, highly indexed database architecture utilizing raw SQL via PDO prepared statements, completely neutralizing SQL injection vectors.

Lead Full-Stack Developer & UI/UX Designer

M&K Jewelry Store | Contract

End-to-end design and development of a premium, high-end e-commerce website, curating an elite digital showroom experience aligned with luxury branding.

Conducted complete UI/UX wireframing, high-fidelity prototyping, and user journey mapping to create an elegant, seamless browsing experience for premium high-value items.

Engineered a secure, lightweight custom backend to handle luxury inventory tracking, automated customer invoicing, and seamless payment gateway integrations.

Optimized frontend performance metrics to ensure lightning-fast image loading and fluid transition states for high-resolution product showcases.
